Summary

DevOps Engineer with over **8 years** of experience in designing, implementing infrastructure, CI/CD and automation. At MEGA, I have defined the **DevOps strategy** to drive innovation and accelerate delivery. I played a key role in establishing the foundation for developing and deploying multi-tenant SaaS applications. Beyond my technical expertise, I was the **primary advocate** for DevOps principles.

Experience

Mega International

Lead DevOps

July 2022 - Present

Paris (FRANCE)

Software company with solutions for Enterprise Architecture, Governance, Business Process Analysis, Data Intelligence etc...

Directed the cultural change by **defining the DevOps strategy**

Mentored a team of three engineers and improved team productivity

Designed Azure landing zone for applications deployed to IaaS/PaaS

Introduced automation **tools and processes** to ease the product life cycle, accelerating delivery through CI/CD pipelines, **Pull Requests**, and Infrastructure as Code (IaC) with **Terraform**.

Managed packages and dependencies with **Azure Artifacts** ensuring consistent builds across environments

Enforced **best practices** to ensure consistency and compliance

Thales Services Numeriques

DevOps Engineer

June 2021 - June 2022

Velizy

Company specialized in the design, development and maintenance of secure Information Systems.

Orange Business Services, within the Azure practice :

Contributed to the design and implementation of the **Landing Zone**

Implemented **hybrid cloud architecture** with Azure Arc

Migrated workload to cloud using Azure Services Recovery

On premises infrastructure assessment with **Azure Migrate**

Neocase Software

Cloud DevOps Engineer

November 2018 - June 2021

La Garenne Colombes

A leading provider of integrated HR and Finance service delivery solutions.

At the core of Cloud and Security team, leading the automation work to cut down delivery time:

Migrated applications to Azure (Lift and Shift)

Automated deployment with PowerShell scripts

ARM templates and **DSC** used to build Infrastructure as Code

Monitored client's application with **ELK stack**

Developed **custom PowerShell module** for application administration

Ariane Systems

Technical Implementation Manager

June 2016 - October 2018

Pantin (FRANCE)

A company providing online check-in/out technologies to the hotel industry.

Within the project team and collaborating with the development team:

Infrastructure management: deployment and management of azure resources

Deploy client environments using webservices

Advanced technical support on the applications

Wrote training documentation and guidelines

Arelis Group

Field Service Engineer

February 2014 - March 2016

Colombes

Specialized in design and integration of electronic solutions

Working with the 2nd Authority for Television and Radio (Jerusalem). Broadcasting DVBT and DVBT2 signal in Israel:

Installation and maintenance of RF transmitters

Network monitoring

Storage and resources management

Ensure client's expectations were satisfied

Education

Institut Supérieur D'Electronique De Paris

Telecommunication Engineering

Sept 2009 - Sept 2012

Wireless networks, Electronics, Digital communications, Web development

Projects

Platform Engineering

Currently designing and implementing an Internal Developer Platform using open-source tools, including Backstage, Azure DevOps, GitHub, and Terraform.

Backend

Building tools: CLI, API, Web App, using Golang, Python, PostgreSQL...
